Color

We consult regularly with industry partners on future color trends, options and technologies. Pigment developers, environmental graphic designers and color stylists are all consulted to be sure that new trends consistently meet the demand of our customers.

The **Sign Finishes Color Palette** consists of frequently used color standards; included are 400 solid and 150 metallic colors. All Color Palette standards have matching in stock color panels which can be ordered and delivered to you or your customer with a quick turnaround.

Color Panel Requests.
Supply a color palette code or custom sample and AkzoNobel will create color panels for you. Color panels are available in two sizes; a credit card size as well as 3" x 6". AkzoNobel has compiled tens of thousands of color formulas which include matches to all Pantone® codes, most vinyl manufacturer colors, RAL, and global manufacturer colors. Order your Sign Finishes Color Panels for project documentation, color accuracy and client approval.

Mixit® Sign Finishes Color Retrieval documentation allows for easy color formula retrieval. Accurately retrieve paint formulas for thousands of AkzoNobel paint shades as well as
